

# AutoPro

## July 2026

Automotive servicing, maintenance and car wash

Make maintenance answer a real question

### Three priorities for the client conversation

01 / Keep the safety series practical through the ongoing summer.

02 / Use a simple question-to-demonstration content loop.

03 / Make service scope clearer than price-led promises.

### UAE / GCC / REST OF WORLD

Historical edition researched on 8 October 2026. Evidence and agency recommendations are separated. These are proposed executions, not existing client campaigns.

Accessed sources: 6 | Proposed briefs: 3 | Portfolio: five brands × four months

# Local analysis — UAE

## 01 / The 31 July fuel-price report explained the cost of filling different vehicles for August.

[U07] 2026-07-31 · UAE · Independent reporting

Published in report month

An August price announcement published in July. Never reuse these historical prices in a current sales post.

## 02 / Dubai Police highlighted roadworthiness, tyre maintenance and vehicle fire precautions during high summer temperatures.

[U04] 2026-06-28 · UAE · Independent reporting

Earlier context / ongoing development

Reported police guidance; technical scripts need qualified review. Do not invent accident-risk reductions.

## What this means for AutoPro

The month-end announcement of August fuel costs and earlier police guidance keep running-cost questions and roadworthiness relevant. Explain checks without promising that servicing offsets a fuel-price increase. July can build on June safety education; it should not pretend that the June advisory is a newly released July source.

Agency interpretation: the recommendation above is a testable creative direction. A source about market conditions or platform activity does not establish this brand's performance.

# Regional analysis — GCC

## 01 / SelfDrive announced expanded Riyadh/Jeddah fleet and digital booking capability around flexible vehicle access.

[R01] 2026-06-25 · Saudi Arabia · Corporate announcement

Earlier context / ongoing development

Corporate announcement: demand statements belong to the company and are not independently quantified or UAE used-car market data.

## 02 / DataReportal's Digital 2026 Saudi report describes platform and connectivity conditions using mainly late-2025 data.

[B01] 2025-11-08 · Saudi Arabia · Baseline research compilation

Earlier context / ongoing development

Published 8 November 2025. Background only; ad audience estimates are not unique active users or monthly growth.

## What this means for AutoPro

Saudi flexible-mobility positioning is earlier context for convenient, clearly described service journeys. It is not a regional maintenance-market growth measure. Use the lesson to shorten the path from a customer question to an approved service enquiry on AutoPro's actual channels.

Agency interpretation: the recommendation above is a testable creative direction. A source about market conditions or platform activity does not establish this brand's performance.

# Global analysis — rest of world

## 01 / YouTube described interactive Shorts tools, including polls, quizzes, Q&A and Add Yours.

[G11] 2026-07-07 · Global platform guidance · Official platform guidance

Published in report month

Official usage guidance, not proof that the features improve brand performance or that every account has access.

## 02 / YouTube announced Shorts viewing controls including clear-screen mode, playback speed and muting.

[G12] 2026-06-25 · Global platform · Official platform announcement

Earlier context / ongoing development

A rollout announcement. Implications for clear on-video storytelling are editorial recommendations, not algorithm rules.

## What this means for AutoPro

Polls, quizzes and Q&A offer a practical structure for technician education. Only use a technical quiz when the answer has been reviewed and is not vehicle-dependent. Clarity inside the video is worth testing across viewers who mute or speed playback; it is not an algorithm claim.

Agency interpretation: the recommendation above is a testable creative direction. A source about market conditions or platform activity does not establish this brand's performance.

# Three briefs worth developing

## 01 / Ask the technician

### Opening hook: What would you check before this journey?

A technician presents a safe, stationary scenario and explains one approved check. Avoid fake diagnoses or staged danger.

Format: Reel Q&A · CTA: Leave a question for the next episode.

Production: one controlled shoot; original footage and cleared audio. Qualified technical review; actual vehicle/service scope and disclosures. Customer or technician permissions; no unsafe demonstration.

## 02 / Myth or model-specific?

### Opening hook: Is this advice true for every car?

Explain a common maintenance statement and identify where manufacturer guidance differs. Keep the answer specific and expert-reviewed.

Format: Carousel · CTA: Save the reminder.

Production: one controlled shoot; original footage and cleared audio. Qualified technical review; actual vehicle/service scope and disclosures. Customer or technician permissions; no unsafe demonstration.

## 03 / What is included?

### Opening hook: What happens during this service?

Film the actual approved service sequence and describe its scope, exclusions and next steps. No guaranteed fuel-savings claim.

Format: Reel · CTA: Ask about the service.

Production: one controlled shoot; original footage and cleared audio. Qualified technical review; actual vehicle/service scope and disclosures. Customer or technician permissions; no unsafe demonstration.

# Recommended mix & test plan

## Illustrative 12-post allocation

This is a proposed planning allocation, not a forecast or an existing client calendar. Replace the two campaign slots with confirmed priorities; never invent an offer.

| Posts | Editorial role                  |
|-------|---------------------------------|
| 5     | Technician education            |
| 3     | Verified service demonstrations |
| 2     | Customer questions              |
| 2     | Confirmed campaigns             |

## A measurable pilot, not a promised uplift

### Useful education

Completion rate, saves and relevant technical questions.

### Service intent

Qualified enquiries and attributable bookings where tracking exists.

Test one creative premise with two different openings, holding format length, paid support, targeting and posting context as similar as practicable. Compare against the brand's recent like-for-like posts using consistent metric definitions. Use reach-normalised saves/comments where available. A small organic comparison is directional, not causal proof.

## Before production

AM validates the client objective and offer. Creative develops a shot list. The relevant product/technical expert reviews claims. Copywriter prepares English and native-reviewed Arabic with equivalent intent, not a literal forced translation. Agree tracking with the channel owner. Baselines and decision thresholds must come from actual account data.

# Sources & reading notes

Reports are reconstructed on 8 October 2026 from accessible public sources. Article publication dates are verified against metadata; current pages may have been updated. This is not an archived feed audit, a comprehensive competitor social audit or measured brand performance. Recommendations and creative hypotheses are authored agency analysis.

Confidence: stronger for directly reported dates/events and official platform statements; limited for market-wide inference from interviews, corporate announcements and adjacent categories. Regional coverage is selective, chiefly Saudi Arabia and Oman plus a GCC aggregate; it is not a six-country social-feed census.
